

MBA 544 : Financial Statement Analysis & Security Valuation

At the end of this course, students will be able to comprehensively understand financial statement analysis. Student will learn how to evaluate a firm's past performance, make judgment about its earnings quality, determine its current financial position, examine the underlying accounting assumptions of its major assets and liabilities, forecast its future prospect and estimate its fundamental value. The core emphasis of this course is on using financial statement analysis for equity valuation purposes. Students will apply methods of fundamental analysis and equity valuation in a series of assignments and projects using financial data of publicly traded Saudi and non-Saudi companies.
